Special Mentorship Opportunity!!!

HACKS FOR HUMANITY

What: Sponsored by Project Humanities at ASU, Hacks for Humanity is a 36-hour hackathon that creates technologies that benefit the common good. Mentors commit to **2-hour blocks** and float to test teams' ideas and to offer guidance throughout the hackathon process.

Who: Anyone interested in utilizing their expertise to help teams spark creativity, generate ideas, problem solve, and develop final presentations.

When: Saturday to Sunday, October 6-7, 2018

Who can be a mentor?

- Developers
- Designers
- Businesspeople
- Humanists
- Engineers
- Artists
- Futurists
- Coders
- Non-coders
- **Anyone!**

"This is my second time coming in as a mentor and I've learned quite a bit mentoring other people and seeing things from others' perspective. It was also incredible seeing middle school and high school students attend. They were phenomenal – their coding, execution, design. It was really amazing overall. I'll definitely come back next year if given the opportunity." — Binhong Lee, Software Developer, workshop leader (2017), and mentor (2016, 2017)
